IN THE CLAIMS:

1 – 35 (Cancelled).

36. (New) A method for stabilizing an object in a patient's body comprising:

contacting a first material comprising a crosslinking polymer in a flowable form with a second material comprising a crosslinking agent to form a mixture;

injecting the mixture into the body to contact the object before transformation of the mixture into gel form; and

stabilizing the object by forming a gel that contacts the object in the patient's body.
